

Physics Fundamentals - Secondary

Secondary grades 1-3: motion, forces, energy.

Motion

- Define velocity and acceleration.
- A car goes 100 m in 5 s. Average speed?

Forces

- State Newton's second law.
- Calculate force: mass 10 kg, acceleration 2 m/s^2 .

Energy

- Kinetic energy of a 2 kg ball at 3 m/s.
- Difference between potential and kinetic energy.
